Indiana County ARES Net Preamble – Revised 10/21/2026

QST, QST, QST calling all amateurs.

This is <your call>. My name is <your name>, and this is the Indiana County Amateur Radio Emergency Services Net. This net is provided and maintained by the volunteer net control operators and members of Indiana County ARES. All amateur radio operators are welcome and encouraged to participate.

Tonight's ARES backup Net Control Officer is <volunteer name>. Next week's Net Control Officer is <volunteer name>

This net meets on this frequency of 146.745 MHz with a negative offset and a PL of 131.8 every Monday evening at 8:00 PM local time. The purpose of this net is to provide ARES members with an opportunity to test their equipment, passing of traffic of general interest, and announcements for Indiana County ARES.

Before we begin tonight's net do we have any emergency or priority traffic for the net, if so please call now.

Does the Indiana County ARES EC, Gary, KC3NHE, have anything for the net?

(Read announcements at this time, if any)

This is a directed net. When called please speak clearly and slowly, giving your call sign and advise if you have traffic for the net. All traffic will be handled at the conclusion of roll call. I will now call the active ARES list as I have it.

< Roll call from ARES Call List >

This completes the active roster as I have it. Are there any new, missed or late check-ins? If so, please call now.

<handle any traffic not handled during roll call>

Before we close tonight's net, do we have any additional traffic or final check ins?

This concludes the Indiana County Amateur Radio Emergency Services net for this evening. We wish to thank the Indiana County Emergency Management Agency for all of the support that they give to Indiana County ARES and the use of the WB3CGY repeater and of course to all those participating this evening, the net isn't possible without your participation. To learn more about Indiana County ARES visit us online at www.icemarc.org or find us on Facebook.

This is <your call> securing the net at <time> and returning this repeater back to general amateur use. 73 and good evening.

INFORMATION CHANGES REGULARLY. ALWAYS CHECK FOR UPDATES!
